

## A 20-5 TYPE WATERSTOP

- They can be used in low, medium and high expansion joints, shear movements and water pressure of any intensity.
- The application method is centralized.
- Waterstops can be joined to each other by heat (thermal) welding (150 °C - 180 °C).

## **TECHNICAL DATA**

## **General Application Areas of Waterstop**

- > Dams,
- Irrigation canals,
- Water tanks, reservoirs,
- Water purification plants,
- > Swimming pools,
- > Docks Transmission tunnels,
- Hydroelectric power plants,
- Bridges,
- Metro constructions,
